### Introduction

This year's Proteus Annual Meeting is the first in the current phase (2021-2025) of the Partnership and will be held remotely due to the ongoing Covid-19 pandemic. The meeting provides an opportunity to discuss current biodiversity topics and explore exciting new tools and developments. We hope this year's annual meeting will be an opportunity to catalyse action for transformation in the year ahead and beyond. As we look towards a post-Covid recovery and an emerging global policy landscape with more ambitious targets for nature and climate, the 2021 Annual Meeting will provide a space for partners to come together with experts to discuss the role of business in supporting these transitions and enabling benefits for nature, climate and people.

### Meeting Objectives

- To highlight and discuss emerging issues and trends in biodiversity conservation, science and policy of strategic relevance to Proteus members.
- To highlight the expertise and tools available to Proteus Partners.
- To discuss action towards a sustainable and just energy transition.
- To explore the benefits of Nature-based Solutions and how they can help contribute to solving multiple challenges.
- To provide space for participants to share insights, updates and innovations that advance the nature-positive agenda.
