

Proteus Workplan 2011

Objective 1:

To significantly improve the accuracy, completeness and currency of information available in the World Database on Protected Areas (WDPA).

Result 1.1: WDPA data content improvements

Result 1.2: Protectedplanet.net functionality improvements

Result 1.3: Protected area quality control

Result 1.4: Communications, Maintenance and Management

Objective 2:

To provide integrated access to information on sites important for threatened and endangered species.

Result 2.1: Provide technical assistance and training

Result 2.2: Further development of the Integrated Biodiversity Assessment Tool (IBAT) partnership and tool

Result 2.3: Integrate the WDPA with other datasets of interest to Proteus

Result 2.4: Integrate the WDPA with information on the IUCN Red List

Result 2.5: Develop partnerships to facilitate increased access to biodiversity data

Objective 3:

Integrate spatial data on coastal and marine ecosystems to test methodologies that decrease the cost of building quality biodiversity datasets.

Result 3.1: Update of coastal and marine datasets through the new global data partnership (especially mangroves, coral reefs, saltmarshes and seagrasses)

Result 3.2: Develop networking and partnership model for improving marine and coastal datasets

Result 3.3: Improve coastal and marine tool functionality building on Protectedplanet.net features
