

WDPA Data Status Report

The World Database on Protected Areas

September 2022

About this Report and the World Database on Protected Areas (WDPA)

The WDPA is the most comprehensive global dataset on terrestrial and marine protected areas, incorporating the official UN List of Protected Areas. The WDPA dataset is not necessarily a complete representation of all the protected areas which have been designated in country. The quality of the WDPA depends on the accessibility of accurate, comprehensive, up-to-date protected areas information from data holders.

This report describes the current status of data in the WDPA for all sites included in the September 2022 monthly release.

Map showing protected areas in the WDPA

 Terrestrial protected areas  Marine and coastal protected areas

Protected areas data in the WDPA

There are 271,131 protected area records stored in the WDPA. 236,850 are national-level protected areas with 34,029 designated under international and regional agreements or conventions. 95% of the data have boundaries in polygon format, with the remaining 5% depicted in point format (i.e. a single latitude and longitude point for the protected area). See Figure 1.

Of the 271,131 protected areas, 17,775 (7%) include a marine or coastal component. These protected areas may be either partially or completely within the marine environment.

Data for protected areas designated under international conventions and agreements

There are 3,133 protected areas in the WDPA designated under international conventions or agreements.

250 are World Heritage sites (WHS), 2,343 are Ramsar Wetlands of International Importance, 540 are UNESCO Man and the Biosphere Reserves (MAB). See Figure 2.

Figure 2: Sites designated under international conventions and agreements

Data for protected areas designated under regional conventions and agreements

There are 11,192 protected areas in the WDPA designated under regional conventions or agreements. 9,243 are Natura2000 sites and 749 sites are designated under regional seas conventions.

Data for national-level protected areas

There are 236,850 national-level protected area records in the WDPA. IUCN Management Categories have been reported for 189,285 of these records. The remaining 47,565 are recorded as Not Reported and Not Assigned.

Figure 3 shows the allocation of IUCN Management Categories across national-level protected area records in the WDPA (numbers of sites in each category are shown in Table 2 at the end of this report).

Figure 3: National-level protected areas by IUCN Management Category

Data for areas protected by local communities, indigenous people and private entities, through non-legal means

There are 252 records in the WDPA that are established through non-legal means.

Completeness of WDPA Data Attributes

The WDPA requires that a minimum set of information is provided with each protected area record. These data attributes are defined by the WDPA Data Standard.

Table 1 shows the extent to which key attributes have been reported by data providers for all protected area records in the WDPA.

Table 1: Completeness of selected attributes

Attribute	Completeness
IUCN Category	80%
Status (designated or proposed)	99.0%
Status Year	88%
Governance Type	93%
Management Authority	87%
Link to Management Plan	11%

The WDPA User Manual 1.6 can be viewed at http://wcmc.io/WDPA_Manual.

Data sources in the WDPA

Data for protected area records in the WDPA have been obtained or validated from over 400 sources.

Figure 4 shows the breakdown of when protected area records in the WDPA were last updated or validated.

Data for protected areas designated under international agreements and conventions have been sourced from the relevant convention secretariat. This includes: UNESCO World Heritage Centre, Ramsar Convention Secretariat and UNESCO Man and The Biosphere Programme.

Data for national-level protected areas in the WDPA have been sourced from national authorities wherever possible. Information may also be supplemented by data from other agencies or organisations working in each country. As part of the update process for national data, national authorities are given the opportunity to review, validate and, where necessary, edit all existing WDPA records for their country. All updates to the WDPA by national authorities take priority over other sources and are considered to be the authoritative version.

There are 967 records in the WDPA with no reported source.

Figure 4: Percentage of records updated or validated by year

Table 2: WDPA Data (as of September 2022)

	Polygons	Points	Total
Realm			
Terrestrial	241,519	11,837	253,356
Coastal*	11,444	0	11,444
Marine	5,907	424	6,331
<i>* under validation by data providers</i>			
Status			
Designated	255,222	11,857	267,079
Proposed	1,219	202	1,421
Established	2,334	191	2,525
Status not reported	34	11	45
Areas designated under international conventions and agreements			
	2,401	732	3,133
UNESCO World Heritage sites (natural or mixed)	250	0	250
Wetlands of International Importance (Ramsar sites)	1,899	444	2,343
UNESCO Man and Biosphere Reserves	252	288	540
Areas designated under regional conventions and agreements			
	30,896	0	30,896
Areas of Special Conservation Interest, Emerald Network (Bern Convention)	1,200	0	1,200
ASEAN Heritage Park	9	0	9
Baltic Sea Protected Area (HELCOM)	177	0	177
Marine Protected Area (CCAMLR)	6	0	6
Marine Protected Area (OSPAR)	494	0	494
Site of Community Importance (Habitats Directive)	3,845	0	3,845
Special Areas of Conservation (Habitats Directive)	19,704	0	19,704
Special Protection Area (Birds Directive)	5,398	0	5,398
Specially Protected Area (Cartagena Convention)	29	0	29
Specially Protected Area of Mediterranean Importance (Barcelona Conv.)	34	0	34
National-level protected areas: IUCN Management Category			
	225,512	11,338	236,850
Ia: Strict Nature Reserve	13,441	67	13,508
Ib: Wilderness Area	3,878	4	3,882
II: National Park	5,747	121	5,868
III: Natural Monument or Feature	18,111	6,831	24,942
IV: Habitat / Species Management Area	80,033	1,674	81,707
V: Protected Landscape / Seascape	49,559	150	49,709
VI: Protected area with sustainable use of natural resources	9,548	121	9,669
Not Assigned	9,408	1,216	10,624
Not Reported	35,787	1,154	36,941
Areas protected by local communities, indigenous people and private entities, through non-legal means			
	61	191	252
Established	61	191	252
Total number of records in the WDPA			
	258,870	12,261	271,131

WDPA Quality Indicators

The percentage of records with boundaries in polygon format

The WDPA stores all records with spatial (location) data. These data can be polygons which represent the boundaries of the protected area, or a single latitude/longitude point which shows the general location of the protected area. This indicator shows the percentage of records with boundaries - the preferred spatial data.

The percentage of data attributes which have been reported by the data provider

Each record in the WDPA has 25 fields for which data attributes are requested. This indicator shows the weighted percentage of data fields which have been reported, based on the minimum and complete attributes.

The percentage of records updated or validated by the data provider in the last 5 years

UNEP-WCMC sets a target to update each record in the WDPA at least every five years. This indicator shows the percentage of records updated in the last 5 years (September 2017 to September 2022).

The percentage of records where the area of the polygon is within 5% of the area reported

The area (km²) reported for a protected area may sometimes differ from the area of the boundary polygon provided, possibly indicating a discrepancy within the information submitted. This indicator shows the percentage of records where the area of the polygon is within a threshold of 5% of the area reported. The threshold allows for differences due to projections and software used for calculating the GIS area.
