

WDPA Data Status Report

The World Database on Protected Areas

February 2018

About this Report and the World Database on Protected Areas (WDPA)

The WDPA is the most comprehensive global dataset on terrestrial and marine protected areas, incorporating the official UN List of Protected Areas. The WDPA dataset is not necessarily a complete representation of all the protected areas which have been designated in country. The quality of the WDPA depends on the accessibility of accurate, comprehensive, up-to-date protected areas information from data holders.

This report describes the current status of data in the WDPA for all sites included in the February 2018 monthly release.

Map showing protected areas in the WDPA

■ Terrestrial protected areas ■ Marine and coastal protected areas

Protected areas data in the WDPA

There are 225,521 protected area records stored in the WDPA, 192,274 are national-level protected areas with 33,245 designated under international and regional agreements or conventions. 96% of the data have boundaries in polygon format, with the remaining 4% depicted in point format (i.e. a single latitude and longitude point for the protected area). See Figure 1.

Of the 225,521 protected areas, 15,513 (7%) include a marine or coastal component. These protected areas may be either partially or completely within the marine environment.

Data for protected areas designated under international conventions and agreements

There are 3,103 protected areas in the WDPA designated under international conventions or agreements.

241 are World Heritage sites (WHS), 2,297 are Ramsar Wetlands of International Importance, 565 are UNESCO Man and the Biosphere Reserves (MAB). See Figure 2.

Figure 2: Sites designated under international conventions and agreements

Data for protected areas designated under regional conventions and agreements

There are 30,142 protected areas in the WDPA designated under regional conventions or agreements. 29,482 are Natura2000 sites and 660 sites are designated under regional seas conventions.

Data for national-level protected areas

There are 192,274 national-level protected area records in the WDPA. IUCN Management Categories have been reported for 147,806 of these records. The remaining 44,468 are recorded as Not Reported and Not Assigned.

Figure 3 shows the allocation of IUCN Management Categories across national-level protected area records in the WDPA (numbers of sites in each category are shown in Table 2 at the end of this report).

Figure 3: National-level protected areas by IUCN Management Category

Data for areas protected by local communities, indigenous people and private entities, through non-legal means

There are 2 records in the WDPA that are established through non-legal means by local communities.

Completeness of WDPA Data Attributes

The WDPA requires that a minimum set of information is provided with each protected area record. These data attributes are defined by the WDPA Data Standard.

Table 1 shows the extent to which key attributes have been reported by data providers for all protected area records in the WDPA.

Table 1: Completeness of selected attributes

Attribute	Completeness
IUCN Category	77%
Status (designated or proposed)	99.9%
Status Year	89%
Governance Type	91%
Management Authority	83%
Link to Management Plan	7%

The WDPA User Manual 1.5 can be viewed at http://wcmc.io/WDPA_Manual.

Data sources in the WDPA

Data for protected area records in the WDPA have been obtained or validated from over 400 sources.

Figure 4 shows the breakdown of when protected area records in the WDPA were last updated or validated.

Data for protected areas designated under international agreements and conventions have been sourced from the relevant convention secretariat. This includes: UNESCO World Heritage Centre, Ramsar Convention Secretariat and UNESCO Man and The Biosphere Programme.

Data for national-level protected areas in the WDPA have been sourced from national authorities wherever possible. Information may also be supplemented by data from other agencies or organisations working in each country. As part of the update process for national data, national authorities are given the opportunity to review, validate and, where necessary, edit all existing WDPA records for their country. All updates to the WDPA by national authorities take priority over other sources and are considered to be the authoritative version.

There are 1,118 records in the WDPA with no reported source.

Figure 4: Percentage of records updated or validated by year

Table 2: WDPa Data (as of February 2018)

	Polygons	Points	Total
Realm			
Terrestrial	201,226	8,782	210,008
Coastal*	10,158	241	10,399
Marine	4,409	705	5,114

Status			
Designated	214,242	9,331	223,573
Proposed	1,434	353	1,787
Established	2	1	3
Status not reported	115	43	158
Areas designated under international conventions and agreements			
	2,027	1,076	3,103
UNESCO World Heritage sites (natural / mixed)	241	0	241
Wetlands of International Importance (Ramsar sites)	1,548	749	2,297
UNESCO Man and Biosphere Reserves	238	327	565
Areas designated under regional conventions and agreements			
	30,142	0	30,142
Baltic Sea Protected Area (HELCOM)	174	0	174
Marine Protected Area (CCAMLR)	6	0	6
Marine Protected Area (OSPAR)	417	0	417
Site of Community Importance (Habitats Directive)	23,878	0	23,878
Special Protection Area (Birds Directive)	5,604	0	5,604
Specially Protected Area (Cartagena Convention)	29	0	29
Specially Protected Area of Mediterranean Importance (Barcelona Conv.)	34	0	34
National-level protected areas: IUCN Management Category			
	183,622	8,652	192,274
Ia: Strict Nature Reserve	11,466	115	11,581
Ib: Wilderness Area	3,052	1	3,053
II: National Park	5,444	109	5,553
III: Natural Monument or Feature	15,581	3,673	19,254
IV: Habitat / Species Management Area	52,973	1,492	54,465
V: Protected Landscape / Seascape	45,335	1,288	46,623
VI: Protected area with sustainable use of natural resources	7,123	154	7,277
Not Assigned	31,484	0	31,484
Not Reported	11,164	1,820	12,984
Areas protected by local communities, indigenous people and private entities, through non-legal means			
	2	0	2
Established	2	0	2
Total number of records in the WDPa			
	215,793	9,728	225,521

WDPA Quality Indicators

The percentage of records with boundaries in polygon format

The WDPA stores all records with spatial (location) data. These data can be polygons which represent the boundaries of the protected area, or a single latitude/longitude point which shows the general location of the protected area. This indicator shows the percentage of records with boundaries - the preferred spatial data.

The percentage of data attributes which have been reported by the data provider

Each record in the WDPA has 25 fields for which data attributes are requested. This indicator shows the weighted percentage of data fields which have been reported, based on the minimum and complete attributes.

The percentage of records updated or validated by the data provider in the last 5 years

UNEP-WCMC sets a target to update each record in the WDPA at least every five years. This indicator shows the percentage of records updated in the last 5 years (since January 2013).

The percentage of records where the area of the polygon is within 5% of the area reported

The area (km²) reported for a protected area may sometimes differ from the area of the boundary polygon provided, possibly indicating a discrepancy within the information submitted. This indicator shows the percentage of records where the area of the polygon is within a threshold of 5% of the area reported. The threshold allows for differences due to projections and software used for calculating the GIS area.
